

REMARKS

In accord with the conversations between Examiner Chambers and Justin Poplin this morning and on 7 November 2005, functional language from the last two paragraphs of the 6,743,111 patent has been incorporated into the independent claims. This functional language has also been included in the remaining independent claims (claims 4 and 13,) along with the necessary antecedent basis (i.e., that the markers are foot positioning markers and club positioning markers). This involved moving the subject matter from claim 5 into claim 4 and canceling claim 5. The only other change was from "on" to "adjacent" in claim 13. "Adjacent" is used in claim 1 and in other places and should not pose a problem. The applicant's understanding is that all of the remaining claims (claims 1-4 and 6-13) are now in condition for allowance, and such is respectfully requested.

Conclusion

The applicant believes that no fees are due in connection with this amendment. If any additional fee is due, please charge Deposit Account No. 12-0600.

In view of the above, the applicant requests allowance of the claims remaining in this application and asks that this application pass to issue.

Should any issues remain, the examiner is encouraged to telephone the undersigned attorney.
